- XO Sails RDM
- XO Sails SDM

**Important Notes:** There are countless bend curves for masts so the 3 popular types, Hard Top, Constant Curve and Flex Top are merely classifications with broad behaviours – rather than specific, quoted tolerances. We've carefully developed our models to ensure that most popular sail brands' products are covered, but cannot ultimately be held responsible for any compatibility issues that arise from specific products or models or for any misinterpretation of the Mast Selector Matrix Tool. All masts are covered by a 1 year warranty term.

Please visit [www.unifiber.net](http://www.unifiber.net) to consult the latest version of the Mast Selector Matrix tool.

JULES BENEL
